o Vaginal sores	o Herpes
o Human Papilloma Virus positive	o STD history (chlamydia, PID, etc)
o Breast cancer	o Fibrocystic breast
o Pain at ovulation	o Cramps / low back pain
o Acne associated with period	

#### Informed Consent

Please take time to read this form, which will provide you with some basic knowledge about acupuncture treatment. While receiving acupuncture treatment, please feel free to communicate with your practitioner what you experience during the needling process, as this will enable the practitioner to adjust the needles and the points selected to maximize your comfort during the treatment. If you experience dizziness, nausea, a colds sweat, shortness of breath, or faintness during treatment, please let the practitioner know immediately. This is known as needle shock, and while its occurrence is rare, it helps to let the practitioner know if you experience any of these symptoms so that the needles can be removed. These symptoms go away immediately after the needles are withdrawn, and are generally caused by anxiety when receiving acupuncture for the first time. Other possible side effects of acupuncture treatment may include local bruising, mild pain in the area treated, brief generalized fatigue, tingling or numbness.

Other important things to keep in mind regarding acupuncture treatment:

- While the needles are in place, do not change your position or move suddenly.
- o Wear comfortable, loose clothing.
- Avoid treatment when excessively fatigued, hungry, full, or emotionally upset.
- We are unable to treat patients who are intoxicated and/ or are abusing substances.

Everyone responds to treatment differently, therefore, we cannot guarantee the outcome of treatment. Some individuals experience total or partial relief of their pain or symptoms after the first few treatments. Others notice steady, gradual improvement. In some cases, no relief is felt at all until after several days go by. Occasionallly, some people notice that their pain worsens before it gets better. Let us know how you respond to the previous treatment at the time of your follow-up treatments, so that your treatment plan can be adjusted accordingly. In addition, patients are responsible for seeking the advice and treatment of their physician should their symptoms change for the worse, or any new condition should arise.

Our Cancellation policy requires that you provide 24-hour notice to cancel your appointment. If less that 24 hour notice is given, you will be charged half your treatment cost at your next appointment.

By signing this informed consent form, you (the patient) acknowledge that you have read the information above carefully and are giving consent for treatment
